About the Project

Valley Metro, in partnership with the town of Queen Creek and San Tan Valley, is conducting a study to develop an understanding of the potential market for future express bus services and a preliminary park-and-ride site for potential commuters in Queen Creek and San Tan Valley.

Based on findings from previous studies, Queen Creek and San Tan Valley demonstrates some existing transit usage despite not having any direct service. The study team will review existing and future traffic patterns, as well as likely park-and-ride site locations for future transit options in Queen Creek and San Tan Valley.

PROJECT STATUS

- Valley Metro analyzed future travel patterns to five key employment districts in the region from the Town of Queen Creek and San Tan Valley.
- The project team performed a demand and needs assessment for express bus or vanpool service and a park-and-ride facility based on the future travel patterns research.

NEXT STEPS

- The study team will review and assess potential park-and-ride sites.
- The public outreach team will create an online survey for public input.
- The study team will review all feedback for final recommendations.

KEY DESTINATIONS

For Daily Work Trips From Queen Creek and San Tan Valley
